## World Wide Web

The WorldWideWeb (W3) is a wide-area [hypermedia](#) information retrieval initiative aiming to give universal access to a large universe of documents.

Everything there is online about W3 is linked directly or indirectly to this document, including an [executive summary](#) of the project, [Mailing lists](#), [Policy](#), November's [W3 news](#), [Frequently Asked Questions](#).

### [What's out there?](#)

Pointers to the world's online information, [subjects](#), [W3 servers](#), etc.

### [Help](#)

on the browser you are using

### [Software Products](#)

A list of W3 project components and their current state. (e.g. [Line Mode](#), X11 [Viola](#), [NeXTStep](#), [Servers](#), [Tools](#), [Mail robot](#), [Library](#))

### [Technical](#)

Details of protocols, formats, program internals etc

### [Bibliography](#)

Paper documentation on W3 and references.

### [People](#)

A list of some people involved in the project.

### [History](#)

A summary of the history of the project.

### [How can I help ?](#)

If you would like to support the web..

### [Getting code](#)

Getting the code by [anonymous FTP](#), etc.

## Welcome to Amazon.com Books!

*One million titles,  
consistently low prices.*

(If you explore just one thing, make it our personal notification service. We think it's very cool!)

**SPOTLIGHT! -- AUGUST 16TH**  
These are the books we love, offered at Amazon.com low prices. The spotlight moves **EVERY** day so please come often.

**ONE MILLION TITLES**  
Search Amazon.com's [million title catalog](#) by author, subject, title, keyword, and more... Or take a look at the [books we recommend](#) in over 20 categories... Check out our [customer reviews](#) and the [award winners](#) from the Hugo and Nebula to the Pulitzer and Nobel... and [bestsellers](#) are 30% off the publishers list...

**EYES & EDITORS, A PERSONAL NOTIFICATION SERVICE**  
Like to know when that book you want comes out in paperback or when your favorite author releases a new title? Eyes, our tireless, automated search agent, will send you mail. Meanwhile, our human editors are busy previewing galleys and reading advance reviews. They can let you know when especially wonderful works are published in particular genres or subject areas. Come in, [meet Eyes](#), and have it all explained.

**YOUR ACCOUNT**  
Check the status of your orders or change the email address and password you have on file with us. Please note that you **do not** need an account to use the store. The first time you place an order, you will be given the opportunity to create an account.

**Auction Web**

[\[Menu\]](#) [\[Listings\]](#) [\[Buyers\]](#) [\[Sellers\]](#) [\[Search\]](#) [\[Contact/Help\]](#) [\[Site Map\]](#)

Welcome to today's online marketplace...

...the market that brings buyers and sellers together in an honest and open environment...

Welcome to eBay's AuctionWeb.

**Welcome to our community.** I'm glad you found us. AuctionWeb is dedicated to bringing together buyers and sellers in an honest and open marketplace. Here, thanks to our [auction format](#), merchandise will always fetch its market value. And there are plenty of great deals to be found!

**Take a look at the listings.** There are always several hundred auctions underway, so you're bound to find something interesting.

If you don't find what you like, take a look at our **Personal Shopper**. It can help you search all the listings. Or, it can keep an eye on new items as they are posted and let you know when something you want appears. If you want to let everyone know what you want, post something on our [wanted page](#).

If you have something to **sell**, start your auction instantly.

**Join our community.** Become a registered user. Registered users receive [additional benefits](#) such as daily updates and the right to participate in our user feedback forum and the bulletin board.

Please **read on** about the AuctionWeb vision...

### IN-BOX DIRECT DELIVERS BEST OF WEB

**OCTOBER 19-21:** Visit Netscape [In-Box Direct](#) and take advantage of an amazing array of Web-rich interactive content, delivered right to your mailbox. In-Box Direct maximizes [Netscape Navigator 3.0's](#) ability to receive pictures, video, audio, and more.

 Netscape [unveiled](#) a new line of intranet solutions for an expanding market of rich, open email and groupware. Using [Netscape Communicator](#) client software and [Netscape SuiteSpot 3.0](#), corporate customers can build and manage full-service intranets.

Recent independent studies by Zona Research and Forrester Research [estimate](#) Netscape's share of the Web server market at 80 percent. Analysts attribute Netscape's lead to its wide range of server solutions and cross-platform architecture.

 IDC Netscape intranet customers are already [realizing](#) a 1000 percent [return on investment](#) in less than three months.

NASDAQ

Technologies ...  
Success drivers?

## Technologies initially

- HTML
  - 18 element types
- HTTP
- URL

## Research community reaction

TBL submitted paper to "Hypertext 91" ... rejected.

- "Links in hypertext must be bidirectional. WWW's are one way only."
- "WWW servers aren't aware of each other and there is no inter-server communication."
- "All WWW servers are equal. There should be a concept of hubs."
- "WWW servers don't keep state. They are completely unaware of their previous interactions."
- "It's obvious that whoever wrote the hypertext engine doesn't understand SGML. This HTML is done all wrong."
- "Finally, he's giving this away for free. That means it has no value at all. We have our own version and a strong licensing partner."

# Technologies initially

- HTML
  - 18 element types
- HTTP
- URL

## Uptake – socio-technical drivers

(1) Piggyback on known technologies:

- |   |   |
|---|---|
| ■ HTML <ul style="list-style-type: none"><li>– 18 element types</li></ul> | ■ SGML <ul style="list-style-type: none"><li>– simplified</li></ul> |
| ■ HTTP  | ■ FTP   |
| ■ URL   | ■ Domain name addresses + Unix folder structure                     |

(2) Open source

(3) Content not compiled – “view source”

## Was success inevitable? Obvious?

- Soundclip
  - David Goodman, IBM:s "identity strategist"
  - Interview at the conference "Digital ID World 2004".
  - Worked with X.500 technologies (think "telco")
  - 05:11 - 06:49

## Was success inevitable? Obvious?

*At the time that that wrapped up would be the time when the web really took off, and perhaps the bubble and the all of the mania around that, sort of swept aside all of the requirements, and in the early days we didn't have a lot of bad guys on the net.*

*So now we are coming back to a point where we were right before all that happened.*

## Was success inevitable? Obvious?

It's an amusing and a painful anecdote about that.

We had a meeting with our research community constituents in Zürich in Switzerland.

It was a meeting between the user group and the X.500 group. We had joint meetings.

This was at the peak of ... we were really growing considerably, quarter on quarter, in terms of the number of organizations plugging into our network that we were coordinating.

## Was success inevitable? Obvious?

A young Englishman who was working at CERN came along to talk to the user group, a guy called Tim Berners-Lee, who wanted to talk about something that he had created, called the World Wide Web.

This was back in 1991.

He gave a very interesting and charming exposé of what the web was about.

And at the end of it ... we listened, we sat respectfully.

## Was success inevitable? Obvious?

And one of our guys got up and said:

*"Well that was really interesting, it sounds like great technology, but do you really think you'll ever get critical mass."*

And I squirm on my feet when I think about that, because we really believed that we were going to get critical mass, and this was just a charming academic exercise that was going to go nowhere.

And in terms of lessons learnt, personally, that was a tremendous one.

## Web technologies now

- Accessibility
- Amaya
- CC/PP
- Compound Document Formats (CDF)
- CSS
- CSS Validator
- Device APIs (DAP)
- Databinding
- Digital Publishing
- DOM
- Efficient XML Interchange (EXI)
- Geolocation
- eGovernment

## Web technologies now

- GRDDL
- Health Care and Life Sciences
- HTML
- HTML Tidy
- HTML Validator
- HTTP
- InkML
- Internationalization
- Jigsaw
- Libwww
- MathML
- Media Annotations
- Media Fragments

## Web technologies now

- Mobile Web Initiative (W3C-MWI)
- Multimodal Interaction
- Open Web Platform
- OWL
- Patent Policy
- PICS
- PNG
- POWDER
- Privacy and P3P
- RDF
- Rules
- Security
- Semantic Web

## Web technologies now

- Service Modeling Language (SML)
- SKOS
- SMIL
- SOAP/XMLP
- SOAP-JMS
- SPARQL
- Style
- SVG
- TAG
- Timed Text
- Tracking Protection
- Ubiquitous Web Applications
- URI/URL

## Web technologies now

- Video
- Voice
- WAI
- Web Applications
- Web Architecture (TAG)
- WebCGM
- Web Services
- Widgets
- WS-Addressing
- WS-CDL
- WSDL
- WS-Policy
- WS-Resource Access

## Web technologies now

- XForms
- XHTML
- XHTML2
- XLink
- XML
- XML Base
- XML Key Management
- XML Processing
- XML Query
- XML Schema
- XML Signature and Encryption
- XPath
- XPointer
- XSL and XSLT

## Technologies now – big bag of things, or ...?

?

HTML5 is the most visible technology.

Often regarded as "the web".

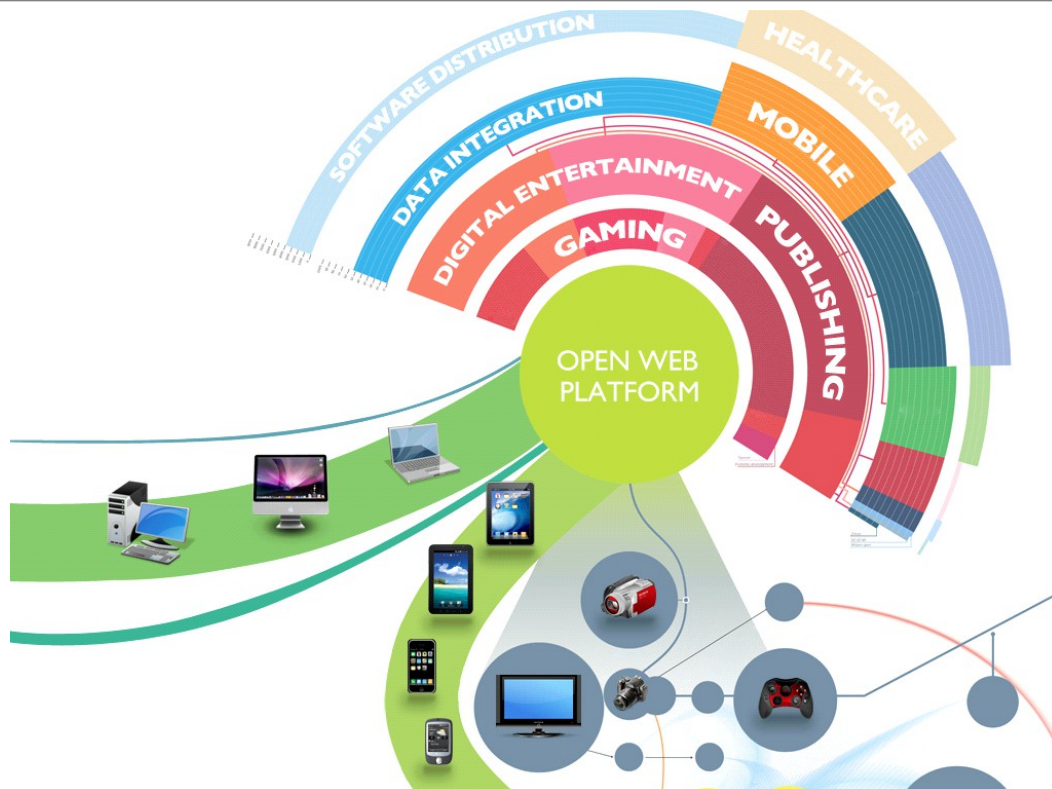

Success drivers:

- Standardized
- Real stakeholders drive standardisation
- Unencumbered by patents
- Recognized standardisation forum

## Developing technologies – historical phases

1. Document structure and linking
2. Document styling ... CSS
3. Rebuild foundation ... XML
4. Rebuild markup ... XHTML
5. Programmable web ... DHTML, JavaScript, Web 2.0
6. Mobile web ... device characteristics, platform functionality
7. Diversify ... other domains/sectors

## Technologies – Open Web Platform

# Competition and threats

## Competition

- At birth of the web
  - Gopher
  - WAIS
  - ....

# Threat

- Browser wars: late 1990s
  - Netscape vs MS Internet Explorer
  - Fragmentation of the web?

# Competition

- Animation & video
  - Macromedia Flash (1996) → Adobe Flash
    - Once popular, now shrinking
  - MS Silverlight (2007)
    - Never took off
  - HTML5 platform is taking over

# Competition

- Mobile web access
  - WAP Forum (2002) (“Wireless access Protocol”)
    - WML
    - WAP
  - Handset Internet browsers now support HTML, CSS, ...
    - WAP/WML has evaporated

# Threat

- WHATWG: “new HTML”
  - Founders (2004): Apple, Mozilla, Opera
  - Smoothly evolved HTML, after HTML 4.01 (1999)
  - W3C focus on XHTML
  - Fragmentation risk?
  - W3C
    - terminates XHTML work
    - Adopts WHATWG's HTML as basis for HTML5
    - HTML5 standard published 2014.

# Competition

- Mobile apps
  - Native vs web
  - Web technology usage growing

# Competition ?

- Entering into new business sectors
  - TV
  - Automotive
  - Publishing
  - Etc.
- Sector-specific innovation initiatives: compete vs. cooperate

## What about failures ?

- Competitors to standardized web technologies:
  - Ultimately failed
- W3C failures?
  - Wrong direction
    - XHTML: disruptive for content providers
  - No big uptake
    - P3P: sites declaring privacy policies
    - Web services: lightweight HTTP-based service popular

Web technologies – general trend

## From static to dynamic

- Originally: declarative
  - HTML: document structure
  - CSS: styling
  - Links: user acts
- Web 2.0: procedural processing
  - JavaScript
  - Document structure: DOM
  - APIs (XMLHttpRequest; ...)
- Recently: the extensible web
  - Procedural extension/redefinition of core functionality
  - Hooks
  - Polyfills

## Example technology standards

Small size specifications ("toolbox"):

- CSS Transitions
- File API
- Quota Management API
- Encrypted Media Extensions
- WebRTC
- IndieUI Events
- Device Orientation Events
- Ambient Light Events
- WebSocket API
- Page Visibility

... and what's in the future ?

## Predictions ?

?

We just use it.  
In many domains.

## General observations

## Lessons?

- Innovation occurs:
  - In gap between disciplines
  - When combining technologies
- How to leverage on existing knowledge/skills?
- Patenting vs huge uptake?

And that's all for now, folks!
